Market Gardeners Wholesale Price List

PLEASE READ BEFORE ORDERING

ORDER EARLY. It will be a great advantage to both you and ourselves, if you will send in your order as early as possible. It is a big task to handle the heavy business transacted in the spring months, and if your order is received early in the season, it simplifies our shipping problems, and you will have the seeds all ready for planting when you want them.

PLEASE USE THE ORDER SHEET AND ENVELOPE enclosed with this price list as then we know at once, that you are entitled to wholesale prices. Always use variety numbers when ordering, and always give full name, complete address, and shipping directions.

CUSTOMERS WILL PLEASE REMIT WHEN ORDERING. We are frequently asked to send small lots where cash is not sent with order, but keeping account of such items entails upon us much bookkeeping labor, and after all is no real convenience to our customers. By curtailing our office expense, etc., we are thus enabled to correspondingly reduce our prices, so that in Salzer's Quality Seeds, our friends find splendid and unusual bargains.

PRICES IN THIS CATALOG ARE NET AND INCLUDE the postage charges, except where noted. If you order goods at "not prepaid" prices, and your order is heavy enough to go by express or freight, you pay the agent upon arrival of the seeds. If there is no agent in your town, please add the necessary amount to prepay the charges. Any over-payment will be promptly refunded to you. For "not prepaid" parcel-post shipments, please see Page 6 of our General Catalog and add the necessary amount for postage.

WE TRY TO SHIP YOUR ORDER WITHIN 24 HOURS after it reaches us, and we guarantee the safe arrival of seeds sent by express or freight, but we cannot be responsible for delays in transit.

WE SELL BEANS, CORN, AND PEAS BY THE POUND and not by measure; one pound is more than one pint, and two pounds more than a quart. Half bushels are sold at bushel rates and half pounds are sold at pound rates.

WHILE OUR SEEDS ARE OF THE FINEST QUALITY, yet there are so many factors that must be taken into consideration that we cannot guarantee the crops, and therefore, in common with all seedsmen, we, the John A. Salzer Seed Co., do not give, and our employees are forbidden to give, any warranty, expressed or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs, or plants we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they must at once be returned and money will be refunded.

A VIEW OF SALZER'S CLIFFWOOD FARM, LA CROSSE, WIS.

SALZER'S FROST-PROOF CABBAGE PLANTS SPELL HANDSOME PROFITS FOR YOU

These cabbage plants will stand frost without being damaged, and will generally stand light freezes. In fact, if they do not withstand 20 degrees above zero, write us and we will replace them or refund your money. Set them out in the open as soon as you can get them into the ground. You will marvel how they take hold immediately and grow and thrive, maturing you a fine crop of cabbage weeks before you can grow a crop from seed. Market gardeners everywhere are making big money from Salzer's Cabbage Plants. You can do likewise.

If you have never used Cabbage Plants before get in on this extra-early crop this year and make your share of some real big money. If you have not been using Salzer's Cabbage Plants, then try Salzer's this year and note the extra-earliness, increased vigor of growth, the increased yield, the increased size and solidity of the heads. Turn to page 18 of our General Catalog and read the testimonials. These are only a few of those received. We haven't room to print them all. People everywhere write in and thank us gratefully, for giving them such fine plants. Our plants are grown under our careful direction along the cool Atlantic Coast, out in the open, all winter long. Hardiness and ability to resist cold is bred right into them, and as soon as they can be gotten into the ground in spring, (they can be set out anywhere,) they will thrive and grow amazingly.

SALZER'S LIGHTNING

Produces fine, solid, hard, marketable heads in about 75 days' time; it is the earliest cabbage in the market, being ripe and solid when other sorts are still in leaves. Of compact growth, few but thick outer leaves, nearly oval in shape, of deep green color, and of excellent quality, tender and crisp. Heart is solid and well blanched. Introduced by us in 1889 and for 36 years has been the cabbage by which other sorts are judged. Continuous and selective improvement at Cliffwood Farms, has resulted in Salzer's Lightning cabbage leading every other sort in extreme extra-earliness and heavy yields. Our Lightning Cabbage Plants were never finer than they are this year.

Salzer's Lightning Cabbage Plants. Per 100 plants, 65c; 200 for \$1.25; 300 for \$1.80; 400 for \$2.25; 500 for \$2.50; 600 for \$2.90; 700 for \$3.30; 800 for \$3.60; 900 for \$3.95; 1000 for \$4.25; postpaid. Not prepaid: 1000 plants or more, at \$3.35, per 1000.

Early Jersey Wakefield, Large Charleston Wakefield, Copenhagen Market, Early Dwarf Flat Dutch, and Succession. Per 100 plants, 50c; 200 for 90c; 300 for \$1.25; 400 for \$1.50; 500 for \$1.75; 600 for \$2.10; 700 for \$2.40; 800 for \$2.70; 900 for \$3.10; 1000 for \$3.25, postpaid. Not prepaid: 1000 or more, at \$2.00 per 1000.

Shipping weight, 25 lbs. per 1000 plants. Orders not filled unless in multiples of 100 of one variety. Plants are sent separate from seed orders.

SALZER'S LIGHTNING IS THE EARLIEST CABBAGE GROWN TODAY.

SALZER'S DISEASE-RESISTANT WISCONSIN HOLLANDER CABBAGE

(See Page 22 of our General Catalog, for illustration.)

"Yellows" and "Yellow Rot" have caused the abandonment of large acreages formerly devoted to cabbage growing. Only a few years ago cabbage had to be practically abandoned near Racine and Kenosha, the heart of the oldest cabbage section in Wisconsin, because the soil had become so badly infected with this destructive fungus, that a satisfactory stand could no longer be secured.

Then after years of experiment and study, Prof. L. R. Jones of the University of Wisconsin secured three strong heads of the Danish Ballhead, or Hollander variety, which were immune to yellows. The seed from these were planted and extensive tests proved the plants from this seed to be as resistant as were the first three heads. Thus was Wisconsin Disease Resistant Seed developed. Badly infected acres are now producing nicely again. **On an inspection trip last fall, we found a badly infected field with only a few cases of yellow wilt, while adjoining fields set with plants from ordinary seed showed only about a 10% stand.** See also our large catalog for further description. **Market Gardeners who have yellow-sick soil, will find this seed one of the most important introductions of the 20th century!** It is perhaps saving millions of dollars for gardeners and growers.

259— $\frac{1}{2}$ oz., 25c; oz., 40c; $\frac{1}{4}$ lb., \$1.25; lb., \$4.25, postpaid.

NORTON WILT-RESISTANT TOMATO

(See Inside Front Cover of General Catalog, for illustration.)

In sections all over the country, the tomato blight is causing the abandonment of tomato fields, with staggering reductions of incomes, just as did the cabbage-wilt. The U. S. Department of Agriculture, however has been studying the situation for years and has produced the Norton Wilt-Resistant Tomato that thrives and produces heavily on badly diseased soil.

Blight and wilt have caused untold losses to tomato growers. In testing out the Norton-Wilt-Resistant, the government reports that **in one test with 102 Norton plants, about 6 per cent were diseased; in another test, only 2 per cent out of the 160 were diseased.** In 149 tests by planters, it was found that there was only about 7 per cent loss of the Norton Wilt-Resistant, because of wilt, **as compared with an average loss of 61 per cent in other varieties.**

One planter set out 125 plants each, of 4 varieties. The three non-resistant strains took the blight after growing three feet. On August 17th they were all dead, but the Norton Wilt-Resistant was still nice and green and bore a good top crop. All varieties had the same treatment **and the Norton averaged 30 to 35 lbs. of fruit to each vine.** Our seed is all from tomatoes grown from seed stock supplied by the U. S. Dept. of Agriculture. Order early as orders will be filled in the rotation in which received, because of our supply being limited. See also Page 1 of our large catalog for further description.

1129— $\frac{1}{2}$ oz. 50c; oz., 95c; $\frac{1}{4}$ lb., \$3.20, postpaid.

DO NOT FAIL TO PLANT DISEASE-RESISTANT STRAINS ON INFECTED SOILS.

SALZER'S VEGETABLE SEEDS

Grown from selected stock—Carefully tested

WHOLESALE PRICES FOR MARKET GARDENERS ONLY

PLEASE NOTE: Prices in this book are net, and include postal charges except where otherwise noted. See page 6 of our large catalog for postal rates on "Not Pre-paid" shipments that are wanted by mail. Half pounds are sold at pound rates, half pecks at peck rates, etc.

Seeds in retail packets (as listed in our Retail Catalog) are subject to a discount of 25 per cent, making each 5c package cost $3\frac{3}{4}$ c; each 10c package cost $7\frac{1}{2}$ c; each 15c package $11\frac{1}{4}$ c; 20c package 15c; etc., etc. This discount applies only to seeds in retail packets. Seeds in retail packets are postpaid.

ONION PLANTS

Our extra-hardy Onion Plants are grown under the same conditions as our Frost Proof Cabbage Plants. You can put them into the ground just as soon as you would ordinarily plant sets, and this early planting means that you'll get earlier crops of fully developed onions, with consequent higher prices at the market. See also Page 48 of our large catalog. No other varieties supplied, except those listed.

Salzer's Prizetaker and White Bermuda Onion Plants—Per 100 plants, 50c; 200 for 90c; 300 for \$1.25; 400 for \$1.50; 500 for \$1.75; 600 for \$2.10; 700 for \$2.40; 800 for \$2.70; 900 for \$3.10; 1000 for \$3.25; postpaid. Not prepaid: 1000 plants or more, at \$2.00 per 1000.

Shipping weight, 25 lbs. per 1000 plants. Orders not filled unless in multiples of 100 of one variety. Plants are sent separate from seed orders.

ONION

SALZER'S SELECT SOUTHPORT YELLOW GLOBE

We specialize in onion seed and we have yet to see any onions that can excell those grown from Salzer's Seeds. Carefully bred and developed, Salzer's Onion Seeds reign supreme, and our low prices this year should determine your giving them at least a trial. Our Yellow Southport is one of the finest keepers, it is very popular, widely grown, and its beautiful globe shape and attractive, light yellow skin, make it a ready seller at good prices. Practically devoid of any neck. Price below.

SALZER'S PRIZETAKER

A very attractive onion, which grows to a splendid size. Easily grown, succeeds in all parts of the United States, fine keeper, and of an unusually mild flavor. Uniform globe shape, small neck, ripens evenly and has pure white, tender flesh. Always attracts attention in the markets, and has been a big money-maker for market gardeners. Our seed is the best obtainable, and at the low price it is a bargain which means a real saving to you. Price below.

SALZER'S NORTHERN GROWN RADISH SEED HAS NO EQUAL

LONG WHITE ICICLE

SALZER'S EARLIEST OF ALL

SALZER'S EARLIEST OF ALL TOMATO

Early tomatoes on the market bring fancy prices, very often as much as 25c to 30c per pound. To secure top notch prices, Mr. Market Gardener, you must have earliness,—earliness combined with quality. Salzer's Earliest of All is all that you can desire in earliness. It ripens in 110 days and sometimes less, up here in the North, and has a fine flavor; it is meaty, productive, tender, and has an attractive appearance.

The fruits are of a good, marketable size, a brilliant scarlet color, nearly round, and are entirely smooth, the flesh being solid and of the finest flavor. They are good shippers and keepers, as they have a tough skin and firm flesh. Vines bear continuously until frost.

1118.—Oz., 50c; $\frac{1}{4}$ lb., \$1.40; lb., \$4.75, postpaid.

HARRIS LOCKED PLANT BANDS

The simplest way to handle plants for transplanting is to grow them in our Ready-To-Use Plant Bands. They come already folded, and all you have to do is to open them, fill with soil and then plant. **These bands are economical, they make an ideal worm guard; in transplanting into the field simply put the band and all into the ground, thus preventing exposing the roots to the air, which always sets the plants back.** By using these it is even possible to transplant sweet corn,

cucumbers, squash, melons, beans, etc. **Plants started in these bands and set in the field, never know they have been moved.** If you sell plants at market, your customers will like to buy them in bands. Prolong your growing period by getting an earlier start. **Plants mature in these bands from 2 to 3 weeks ahead of those grown by any other method.** Take advantage of the high prices by bringing your vegetables to an earlier maturity.

5201.—Price, postpaid: 2x2x2½ in. deep, 45c per 100; \$1.00 per 250; \$1.80 per 500; \$3.45 per 1000, postpaid.

DON'T SPECULATE. SOW SALZER'S SEEDS.

SALZER'S SELECTED FLOWER SEEDS NORTHERN GROWN

Beautiful garden flowers find a ready sale on the market, but you can also have a heavy sale of flowers right at your gate, with passing motorists. Plant Salzer's Selected Flower Seeds—they are the finest obtainable, the hardiest and freest blooming. These low prices are for market gardeners only and include postage. On retail packets deduct 25% discount from the retail catalogue prices making each 10c packet cost you 7½c, each 25c packet cost you 18¾c, etc.

SALZER'S NORTHERN GROWN STRAWBERRIES

Our famous Strawberry Plants, grown on virgin soil, and grown for plants alone, are big money makers, and the most satisfactory in the long run. Every one of our propagating strawberry beds are grown for plants, and nothing else. Some concerns attempt to secure fruit as a by-product from their propagating fields. When this practice is followed, only the outside edges of the row are removed and sold, the centers being saved for fruiting purposes. By that method the customer receives only the end runner

plants—the last ones formed, and naturally the smallest and most poorly rooted.

In our fields, under our method of digging, these end-runner plants are entirely discarded, and the plants used for filling our orders are taken from the heart of the row, every plant large and strong, fully developed, ready to make a quick, sturdy growth in your fields this year. The varieties listed below, all have “perfect flowers”.

DR. BURRILL—“The Million Dollar Berry.” Is one of the best general purpose strawberries ever produced. It is commonly known as the “Improved Sen. Dunlap”, which is enough of a recommendation for anyone to feel safe in planting it. Anyone who has ever grown strawberries has heard of Sen. Dunlap, that grows anywhere and blossoms and fruits among weeds if necessary, but still brings a fine crop of berries to perfect maturity.

That's just what Dr. Burrill does, too, for it has all of the same good qualities and more too. On account of its extra long, sturdy roots, heavy crowns and healthy foliage, it is able to produce a heavy crop of handsome, luscious, best quality berries every year, regardless of rainfall. With its extra long root system it is able to draw moisture from a greater depth than the average strawberry.

SENATOR DUNLAP—“The Old Reliable.” Grown as the MAIN CROP BERRY throughout the country! It will produce a full crop in a wider range of soil and climate than any other variety. Thrives and produces in every state in the union.

Senator Dunlap is a very heavy bearer of good sized, uniformly shaped berries of a beautiful, very dark red color. It is a first class shipper, holding its bright color and always making a fresh appearance on any market. Plants are noted for their hardiness and strength. It will make money for gardeners everywhere.

GIBSON—“The Standard of Excellence.” Usually produces from two to four large fruit stems on every plant. No wonder it yields such great quantities of fruit. The vines are simply loaded with berries that are of largest size and of a beautiful dark, glossy red color, extending clear to the heart of the berry. Has very fine flavor, is a good shipper, and does equally well in all soils and climates.

GANDY—The favorite late strawberry. Largest size fruit, uniform in shape, of a handsome and attractive appearance, and luscious in quality. Thrives everywhere, and never fails to produce a good sized crop. A real money maker.

PROGRESSIVE—This standard everbearer is known and grown throughout the country, bringing fine, fresh berries to thousands of homes all through the summer and fall. It grows and produces good crops of delicious berries on any fertile soil and in nearly every climate. A full crop comes the same year the plants are set. It is particularly adapted to hill culture, one plant often producing 100 perfect berries during the season.

The fruit is a beautiful, dark, glossy red color, and is more mild in flavor than June berries. For making jams, jellies, sauces and preserves, the housewife finds Progressive the best. People and restaurants enjoy strawberry shortcake in October and November. You can make money with Progressive.

SALZER'S FERTILIZERS

PRICES ARE F. O. B. LA CROSSE UNLESS OTHERWISE NOTED

5560.—FORD AMMONIUM SULPHATE. Nitrogen, the main constituent of ammonia, exerts more influence on the quick growth, early yield, and quality of crops, than other fertilizers. Everyone knows the value of manure as a fertilizer. Fifty pounds of Ford Ammonium Sulphate contains more nitrogen than one ton of manure. It is a highly concentrated product and should be sparingly used. It is always best to apply it as a top dressing when vegetation or foliage is dry, or if applied when vegetation or foliage is wet, the ammonium sulphate should be washed into the ground immediately by a thorough sprinkling in order to avoid any possibility of burning. For field crops, apply on ground away from vegetation. Never apply during a hot, dry spell. It is better, though to work it into the soil when seeding. For general garden use, sprinkle and rake into the soil about 2 lbs. to 1000 square feet just before seeds are planted. For any crop that needs it, apply about 100 pounds per acre, working into the sod before seeding, or broadcasting and harrowing in when fitting the land, or part may be handled this way and the balance used as a top dressing after growth has started. Ammonium sulphate supplies nitrogen alone and enough potash and phosphate should either be already present in the soil or it should be supplied additionally. Not prepaid: Lb., 15c; 5 lbs., 60c; 10 lbs., 95c; 25 lbs., \$1.80; 50 lbs., \$3.25; 100 lbs., \$5.75; 500 lbs., \$27.00.

5502.—ALL SOLUBLE. For market gardeners. This brand has been prepared for such crops as require an extra quick, strong fertilizer; should be mixed well into the soil. Adapted for tobacco, hops, potatoes, flax, sugar beets, early cabbage, cauliflower, celery, fruits, especially strawberries; suitable for all soils (except sour). Use 250 to 500 lbs. per acre. Analysis, 2-12-2. Not prepaid: 5 lbs., 30c; 10 lbs., 45c; 25 lbs., 95c; 50 lbs., \$1.65; 125 lbs., \$3.75; 250 lbs., \$7.35; 500 lbs., \$14.50.

5509.—NITRATE OF SODA. Nitrate of Soda is not a substitute for other Manures, but we recommend it as a cheap form in which to apply Nitrogen to plants. Gardeners who are using farm manure should continue to use it, but use Nitrate of Soda in addition to other fertilizers. Remove the lumps before using and break them up, which can be done by pounding. Use as a top dressing at the rate of 100 lbs. per acre. For the Home Garden apply as a solution one ounce to two gallons of water. Not prepaid: 5 lbs., 40c; 10 lbs., 70c; 25 lbs., \$1.40; 50 lbs., \$2.65; 100 lbs., \$4.85; 500 lbs., \$23.80.

5538.—POTATO GROWER. This fertilizer is of special use for the potato crop, and is also adapted for sweet potatoes, vines, fruit trees and all leguminous plants. Use at the rate of 250 to 500 lbs. per acre. Analysis 2-12-6. Not prepaid: 125 lbs., \$4.20; 250 lbs., \$8.30; 500 lbs., \$16.00.

5552.—FRUIT AND ROOT CROP GROWER. For fruit trees and small fruits, garden truck, tobacco, potatoes, sugar beets, etc. Use 250 to 500 lbs. per acre. Analysis, 4-8-6. Not prepaid: 125 lbs., \$4.20; 250 lbs., \$8.30; 500 lbs., \$16.00.

5511.—BONE MEAL FERTILIZER. A by-product of the large packing houses; it is made from fresh green bone with an analysis of about 3 per cent ammonia, 27 per cent phosphoric acid and 50 per cent bone phosphate. This fertilizer has been steamed in order to give quicker action. Is considered one of the most lasting and result producing fertilizers obtainable. Not prepaid: 5 lbs., 30c; 10 lbs., 45c; 25 lbs., 85c; 50 lbs., \$1.65; 125 lbs., \$3.70; 250 lbs., \$7.10; 500 lbs., \$13.80.

5510.—ACID PHOSPHATE. Sixteen per cent available Animal or bone phosphate in the most available form. Used on grain crops and others requiring an excessive amount of phosphoric acid. Not prepaid: 5 lbs., 20c; 10 lbs., 35c; 25 lbs., 75c; 50 lbs., \$1.40; 125 lbs., \$3.15; 250 lbs., \$6.15; 500 lbs., \$11.80.

5586.—SHEEP MANURE. This fertilizer is dry, pulverized and screened and all undigested weed seeds have been destroyed so they cannot under and circumstances germinate. The analysis is: Ammonia, 2.73 per cent; Phosphoric Acid, 1.75 per cent; Potash, 1.50 per cent; Humus, 90 per cent. Not prepaid: 5 lbs., 20c; 10 lbs., 35c; 25 lbs., 75c; 50 lbs., \$1.30; 100 lbs., \$2.45; 500 lbs., \$11.70.

5514.—CORN GROWER. Contains a large percentage of phosphoric acid and potash, the most essential elements in the production of a maximum corn crop. Nitrogen is also supplied in sufficient quantity to form a well-balanced, complete fertilizer. An excellent brand for black soils. Use 250 to 500 lbs. per acre; half broadcast, balance in hills or drills, mixing thoroughly with the soil before planting. Analysis, 2-12-2. Not prepaid: 125 lbs., \$3.75; 250 lbs., \$7.35; 500 lbs., \$14.60.

5512.—PHOSPHATE AND POTASH. For general farm crop. An especially good fertilizer for clover and alfalfa, also for strengthening and balancing farm manures. Should not be used on sour loams or heavy clay lands. 250 to 500 lbs. per acre. Analysis, 0-14-4. Not prepaid: 5 lbs., 30c; 10 lbs., 45c; 25 lbs., 85c; 50 lbs., \$1.50; 125 lbs., \$3.60; 250 lbs., \$7.10; 500 lbs., \$13.90.

INSECTICIDES AND FUNGICIDES

5476—SLUG SHOT DUSTER WITH PERFORATED TOP. Each, 70c, postpaid.

5434—RED WING INSECT POWDER. Small size, 12c; 2nd size, 20c, postpaid.

FOR POSTAL RATES, SEE PAGE 6 OF OUR LARGE CATALOG.

SEED GRAIN, CLOVERS AND GRASSES

Market Gardeners, write for special prices on your requirements. We can save you money!

INOCULATING ^{Legume Inoculation} **HUMOGERM** BACTERIA

Even though your soil is rich, inoculation will give you still better and earlier crops, and it will greatly enrich your soil for future crops. Inoculation of seeds is inexpensive, and it is simple and easy. Cultural directions are on each package. Only those seeds which are legumes, such as beans, lima beans, peas and peanuts require inoculation. We urge you to take advantage of the following low prices:

Garden Beans, Peas, Sweet Peas		Lima Beans and Peanuts	
	Postpaid Price		Postpaid Price
6000.—Garden Size Only	\$.20	6005.— $\frac{1}{4}$ bu. size	\$.30
6001.— $\frac{1}{4}$ bu. size30	6006.— $\frac{1}{2}$ bu. size55

6003.—1 bu. size90	6008.—2 $\frac{1}{2}$ bu. size	2.00

For Humogerm to inoculate other seeds, see Page 118 of our general catalog. Market Gardeners may use the above rates in ordering Humogerm for seeds other than listed above.

SALZER'S IMPROVED CONSTELLATION GARDEN TOOLS

For illustration of this splendid combination outfit, see Page 129 of our general catalog. It has all of the equipment that you need from the initial seeding to the final cultivation. There is one standard frame used throughout, and if you wish, you may purchase first one of the tools (such as the single wheel hoe) and then add to it from time to time, until you have the complete machine. The price for the complete machine is so low, however, that we urge you to purchase it complete, as we know you will receive more than your money's worth. This tool is indispensable to market gardeners. All of the parts are made of the best materials, carefully fitted, and attractively finished, and we stand solidly behind every tool we furnish, guaranteeing them to give satisfaction and to be as represented.

NORTHERN GROWN SEED POTATOES

We are the largest growers of seed potatoes in the world; in our cellars in La Crosse we annually store from 60,000 to 80,000 bushels, which we grow on our farms in Northern Minnesota. Salzer's Northern Grown Seed Potatoes are known everywhere for their purity and trueness to type. Growers should renew their seed stock at least every two years, and by planting Salzer's Northern Grown Potatoes they will obtain not only the largest but also the earliest crops.

Salzer's Russet Rural Potato

A grand main crop variety. Tubers are round to oblong in shape, of good size, with pure white flesh, and covered with a russet skin, and few and shallow eyes. They have a quality either baked or boiled that cannot be excelled. Salzer's Russet Rural is enormously productive. Note our low prices: **Not prepaid:** Bu., (60 lbs.), \$1.20; 9 bu., \$9.95.

EARLY VARIETIES

	Bu.	9 bu.
Salzer's Early Six Weeks	\$1.50	\$13.25
Eagle Valley Irish Cobblers	1.30	11.40
Eagle Valley Bliss Triumph	1.55	13.65

NOTE: To prevent damage in transit, potatoes going 400 miles or more should be packed in barrels, for which add 50c per barrel extra. 1 barrel holds 3 bu.

SALZER'S NORTHERN GROWN POTATO EYES

Enables everyone to obtain Salzer's Quality Potatoes, regardless of where they live. **Certified Ohios:** 20 eyes, 30c; 60 for 70c; 100 for \$1.10; 250 for \$2.50; 1000 for \$9.00, postpaid. **Other Varieties:** 20 eyes, 25c; 60 for 80c; 100 for 80c; 250 for \$2.00; 1000 for \$7.95, postpaid.

SALZER'S SEED POTATOES PRODUCE THE LARGEST YIELDS.

SALZER'S FERRIS WHEEL TOMATO

**Prodigious Yields of Immense-Sized Fruits—Thick Flesh—
Small Seed Cavity—Does Not Split Easily.**

Market Gardeners, get in on this! If you are not planting Salzer's Ferris Wheel Tomato, **you are not making all the money that you can make.** Mother Earth is waiting with her wonderful store of energy,—it remains for you to **sow Salzer's Famous Ferris Wheel Tomato!** She is waiting to reward you with some of the largest, most delicious tomatoes being grown today, that sell themselves at sight on the market! **Why let your neighbor reap all the benefits?** Sow Salzer's Ferris Wheel and put a lot of big, silver dollars in your pockets. Put the surplus in the bank.

This grand tomato was introduced by us years ago. The Ferris Wheel was then the big invention of the age and we promptly named it, "Ferris Wheel". Seems a bit funny, doesn't it, that the ordinary Ferris Wheel was once a startling invention, especially in the light of recent discoveries. But this grand tomato took like wild-fire, especially with market gardeners, and today it is not being displaced one whit by other tomato introductions, holding its own and more, in size, solidity, flavor, and enormous yields with any on the market. It has a handsome, dark purplish-crimson skin. It's a beauty. See also Page 61 of our large catalog. Order early.

1139.—Oz., 55c; $\frac{1}{4}$ lb., \$1.75; lb., \$6.80, postpaid.
